Below you will find a sample layout of activity centers based on the space needs of each. This layout is based on the block of South St. Louis Avenue between West 56th and 57th Streets. The street area is approximately 530 feet long and 45 feet wide. This block was chosen due to its proximity to both Senka Park and Sandoval Elementary School. (Note: Some activity centers' dimensions were changed to be rectangular instead of square to accommodate the street set-up but total area is still the same)
